Significant Events

Date: 2013/04/09 **Time:** 20:57 **Type:** Spill Report (NRC#: 1043448)

Location: ALEXANDRIA, LA (RAPIDES County)

Description: An undetermined amount (several fluid ounces) of mercury spilled from a plastic jug (gallon size) to concrete floor inside city of Alexandria water pumping/monitoring station on 4/8/13 at 9:30 AM. The City of Alexandria contacted the NRC/LSP hotline on 4/9/13 at 5:18 PM and the Alexandria PD took evidence from the spill site at approximately 5:30 PM without being briefed on the mercury vapor hazards present in the monitoring station. Alexandria PD reported that up to 4 members of the investigation team were in the monitoring station for several hours and unaware of the potential exposure from mercury vapors. OSC Delgado informed the lead detective on the proper precautions to implement until the situation could be assessed properly. Alexandria PD is compiling a list of all that entered the building since spill first discovered and if the team members that entered the site walked into their residences with the boots they were wearing while at the spill site. The City of Alexandria has hired a cleanup contractor and consultant for the spill and will present a workplan and discuss the resources they have on hand to address the emergency to LDEQ/LSP/EPA on 4/10/13 at 8:30am. LDEQ has requested EPA assistance for potential cleanup if the City's contractors do not have the resources or expertise to address the mercury spill. OSC Delgado has activated START to perform mercury vapor monitoring of the

potentially contaminated clothing, squad cars, and residences of the Alexandria PD investigation team. OSC Bernier (R1) will participate on the conference call and is ready to mobilize if EPA assistance is required.

Field Operations

No Ops Log entries for this reporting period

Exercises

No exercises for this reporting period

Wednesday, April 10, 2013

6SF-PC Misty Ward - TNG - CPR Training TX/OK Rms
